This Fund is an alternative mutual fund. It has the ability to invest in asset classes or use investment strategies that are not permitted for conventional mutual funds. The specific strategies that differentiate this Fund from conventional mutual funds include: increased use of derivatives for hedging and non-hedging purposes; increased ability to sell securities short; and the ability to borrow cash to use for investment purposes. While these strategies will be used in accordance with the Fund’s investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.

HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

NO GUARANTEES

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

RISK RATING

The Manager has rated the volatility of this Fund as **Low to Medium**.

Generally, the rating is based on how much the fund's returns have changed from year to year. It doesn't tell you how volatile the fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the "What are the risks of investing in the Fund?" section of the Fund's simplified prospectus.

A WORD ABOUT TAX

In general, you will have to pay tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the Fund in a registered plan such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Class F Units of the Fund. The fees and expenses – including any commissions – can vary among classes of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

1. Sales Charges

You may have to pay a sales charge when you buy Class F Units of the Fund.

SALES CHARGE OPTION	WHAT YOU PAY		HOW IT WORKS
	In percent (%)	In dollars (\$)

2. Fund Expenses

You don't pay these expenses directly. They affect you because they reduce the Fund's returns. As at December 31, 2023, the Fund's expenses with respect to Class F Units were 1.24% of its value. This equals \$12.40 for every \$1,000 invested.

	Annual Rate (as a % of the Fund's Value)

Fund expenses	1.24%

Subject to the attainment of the High Water Mark (described below), the Manager is entitled to receive from the Fund in respect of Class F Units an annual performance fee (the "**Performance Fee**"), plus applicable taxes. The Performance Fee is equal to 15% of the amount by which the net asset value per Class F Unit as at the last business day of each year exceeds a threshold increase (or "hurdle rate") of 5% over its High Water Mark.

For the purposes of determining the Manager's entitlement to a Performance Fee, the "**High Water Mark**" for a Class F Unit of the Fund as at any date means: (i) during the year in which the Class F Unit is issued, its subscription price; and (ii) during all subsequent years, the higher of the net asset value per Class F Unit as at the beginning of such year and any previous High Water Mark.
